

SMALL TEMPERATURE RECORDER

30M READINGS
ON A SINGLE AA
BATTERY

The RBRsolo³ T is one of RBR's most compact, lightweight, and versatile single channel recorders. The logger offers flexible measurement schedules, standard sampling up to 2Hz (optionally up to 32Hz), large memory, extra power for extended deployments, USB-C download for large data files, and temperature accuracy of $\pm 0.002^{\circ}\text{C}$.

FEATURES

The RBRsolo³ T is available in the following configurations:

- ▶ RBRsolo³ T up to 2Hz continuous sampling
- ▶ RBRsolo³ T|fast16 up to 16Hz continuous sampling
- ▶ RBRsolo³ T|fast32 up to 32Hz continuous sampling

The RBRsolo³ T makes it easy to configure the optimum sampling regime for your measurements whether it is moored, towed, or profiling. The large data storage capacity and fast download ability facilitate long deployments with higher sampling rates. A dedicated desiccant holder makes it simple to replace desiccant before each deployment.

The RBRsolo³ T is one of the most flexible single channel recorders available from RBR and like all RBR instruments, the calibration coefficients are stored with the logger. Dataset export to Matlab, Excel, OceanDataView®, or text files makes post processing with your own algorithms effortless.
